

Gridwise Carbon

Gridwise Carbon Pitch Deck

Sector: ClimateTech / Carbon Accounting / B2B SaaS

Stage: pre-seed

Geography: UK / Europe / Worldwide

Raise amount: GBP 700,000

Traction: GBP 5k MRR, 15 pilot customers

Problem: Target customers waste time and money because existing workflows are fragmented, manual, and hard to measure.

Solution: Carbon accounting and supplier emissions tracking for SMEs.

Business model: B2B SaaS subscription with implementation support.

Team: Founder-led team with product, commercial, and domain experience; hiring plans focus on engineering, sales, and customer success.

Go-to-market: Start in the UK, expand into Europe, and selectively target worldwide investors and customers where the thesis matches.

Financial assumptions: current monthly revenue 5000, burn 39000, cash 150000, gross margin 76%.

Investor ask: Raising GBP 700,000 to fund the next 18 months, prove repeatable acquisition, and reach the milestones in the financial model.

Use of funds: product development, customer acquisition, compliance or data where relevant, and core hires.
